Ground unit material recipies

|	
3D printer	3D printer
+	+
eggshells	red clay
+	+
grain husks and seeds of native plants	buckwheat hulls
+	+
potato and bean starch	mycelium
=	=
top part of the ground unit	bottom part of the ground unit

the ground unit is buried halfway into the ground, allowing insects to enter through the upper part, made of eggshells, while the lower, clay section serves as a nesting area
